

FREEDOM TO PLAY

# ERGONOMIC CHILDREN'S CHAIR OFFERING FREEDOM TO PLAY

## **SAFE AND ERGONOMIC**

A child's chair is not just an aid for sitting, it can also help children to learn. The new range of VELA Hip Hop chairs is revolutionising the market for children's chairs thanks to the outstanding level of focus on ergonomics and safety.

Ergonomy takes pride of place, and VELA Hip Hop's revolutionary back and seat system can be adapted to suit the individual child.

## **REVOLUTIONARY CHAIR BACK PROVIDES OPTIMAL SUPPORT**

The two-section chair back for the VELA Hip Hop series represents ground-breaking chair back design developed by VELA. The two independent padded sections provide optimum support because the chair back shapes itself to the child's back, almost embracing the child.

## SEAT TO SUIT THE CHILD

Not all children are the same, for which reason it is possible to switch between a soft or firm foam section in the middle of the seat thanks to a foam insert which can be turned accordingly. Wedges in the seat also help to create the right seat shape, supporting the child's individual sitting position.

At the knees and under and along the thighs, a soft foam pillow provides support and guidance for enhanced comfort. The seat and back come in several different sizes.

## ACCESSORIES

The VELA Hip Hop, VELA Tango series can be fitted with a large range of accessories such as thigh supports, tables, seat belts, body supports, trays, neck supports, push bracket and folding footrests.

VELA Hip Hop 100

## VELA HIP HOP 100 - SAFE CHAIR FOR SCHOOL

VELA Hip Hop 100 is a safe and smart chair for using at school when sitting and working at a desk. It easily slides in under a school desk, and its discreet design will not dominate the classroom. It has a central brake system, which quickly and effectively locks the chair in place.

## FORWARDS AND BACKWARDS SEAT TILT

The VELA Hip Hop 100 can be angled 10° forwards for an active sitting position. The seat can also be angled 8° backwards, thereby offering plenty of scope for varied sitting positions.

REVOLUTIONARY BACK AND SEAT SYSTEM  
WHICH CAN BE INDIVIDUALLY ADJUSTED

# VELA TANGO 100ES/S JUNIOR CHAIR FOR SCHOOL AND HOME

## THE BEST OF TWO WORLDS

VELA Tango 100ES/S combines two successful VELA chairs to make the chair future-proof.

The underframe originates from the VELA Tango, VELA's famous office chair, which provides additional stability and safety with its robust chassis and brake function.

## ERGONOMIC SEAT/BACK SYSTEM

The ergonomic seat/back system from VELA Hip Hop, VELA's children's chair, gives your child optimum comfort when seated and can be adjusted in many different ways.

The dual back provides unique support as it moulds itself to your child's back and almost wraps the child in the chair.

The seat is divided into three zones which can all be adapted separately. This chair has both a soft and hard padding option as the seat can be reversed - just like a mattress with two sides.

## DEVELOPMENT OPTIONS

### – ONE CHAIR, MANY POSSIBILITIES

This combination of an adult/child's chair gives your child the unique opportunity to grow in the chair. When your child becomes a teenager/adult and needs an adult chair, all you have to do is replace the seat and back, a feature which also means that the chair can be used for both children and adults when later reused by others.

# CENTRAL BRAKE SYSTEM ON ALL FOUR WHEELS

## CENTRAL BRAKE SYSTEM ENSURES MAXIMUM SAFETY AND LEARNING

A significant factor for boosting learning is a chair which is completely stable so the child does not have to think about stopping it from moving around. VELA Hip Hop 300E therefore has an integrated central brake system on all four wheels, ensuring a high level of stability and safety, also when getting in and out of the chair.

*VELA Hip Hop 300E*

- Passive and active sitting positions: can be tilted 10° forwards and 8° backwards. Can also be angled 24° backwards to a resting position
- With gas or electric height adjustment, the VELA Hip Hop 300E can be lowered to 28 cm and raised to 68 cm – perfect for play
- Integrated four-wheel central brake system for maximum safety and for school

### PLAYING AT FLOOR LEVEL

The height of the VELA Hip Hop 300E chairs can be adjusted down to 28 cm and up to 68 cm, enabling the child to play on the floor, and then get back into the chair unassisted.

### ACTIVE AND PASSIVE SITTING POSITIONS – TWO KEY FUNCTIONS IN THE DAILY LIFE OF A CHILD

The chair can be tilted 10° forwards for an active sitting position. And when the child needs a passive and relaxed sitting position, the seat can easily and safely be angled 8° backwards or 24° to a resting position. This gives the chair two essential functions for the child in his or her daily life.
